What is?

OASIS (Open architecture for Accesible Services Integration and Standardisation) is a Large Scale Integrated Project.

Objectives

The aim is develop an open and innovative reference architecture, based upon ontologies and semantic services, that will allow plug and play and cost-effective interconnection of existing and newly developed services in all domains required for the independent and autonomous living of older people and their Quality of Life enhancement.

For who?

Through this new architecture over 12 different types of services are connected with the OASIS Platform for the benefit of older people; they cover user needs and wants in terms of Independent Living Applications, Socialization, Autonomous Mobility, Smart Workplaces.

ITACA-TSB in OASIS

ITACA-TSB is heavily involved in this Project, managing the Independent Living applications development to support their physical and psychological independence, stimulate their social engagement and foster their emotional well being.
